JIRA REPORTS

Introduction

This Software Test Report (STR) was created as part of a QA course project, focusing on the **“Olive Young” mobile application**, an e-commerce platform for beauty and health products.

The goal of this STR is to document the test planning, execution, and outcomes, while supporting the development of practical skills and a deeper understanding of end-to-end software testing in a real-world context.

To manage and document the testing activities efficiently, I utilized **TestRail for writing and executing detailed test cases** across various categories.

Additionally, I used **Jira for bug tracking**, prioritizing issues based on **severity and priority**.

This report reflects a methodical approach to mobile app testing, guided by industry best practices and a focus on delivering a high-quality digital product.

Purpose

The purpose of this project is to apply theoretical knowledge gained during the QA course to a practical, real-world scenario by testing the Olive Young mobile application.

Through this hands-on experience, I aimed to strengthen my understanding of the complete software testing lifecycle, from test planning and design to execution and bug reporting.

Ultimately, this project served as a platform to build confidence, improve technical QA skills, and understand the importance of structured, methodical testing in delivering high-quality digital products.

Application Overview

Olive Young is a popular mobile application developed by one of South Korea's leading health and beauty retailers.

Originally exclusive to the South Korean market, the app has recently expanded its services globally, making its wide range of cosmetics, skincare, and wellness products accessible to international customers.

The app offers a seamless shopping experience with features such as product browsing, search and filtering, customer reviews, promotions, personalized recommendations, and secure checkout.

It is designed to support both Korean and global users, with multilingual support and international shipping options.

Olive Young continues to grow as a trusted platform in the global beauty and wellness e-commerce market.

Testing Scope

The testing focused on evaluating the quality, performance, and usability of the Olive Young mobile app across various mobile devices.

Key testing types included:

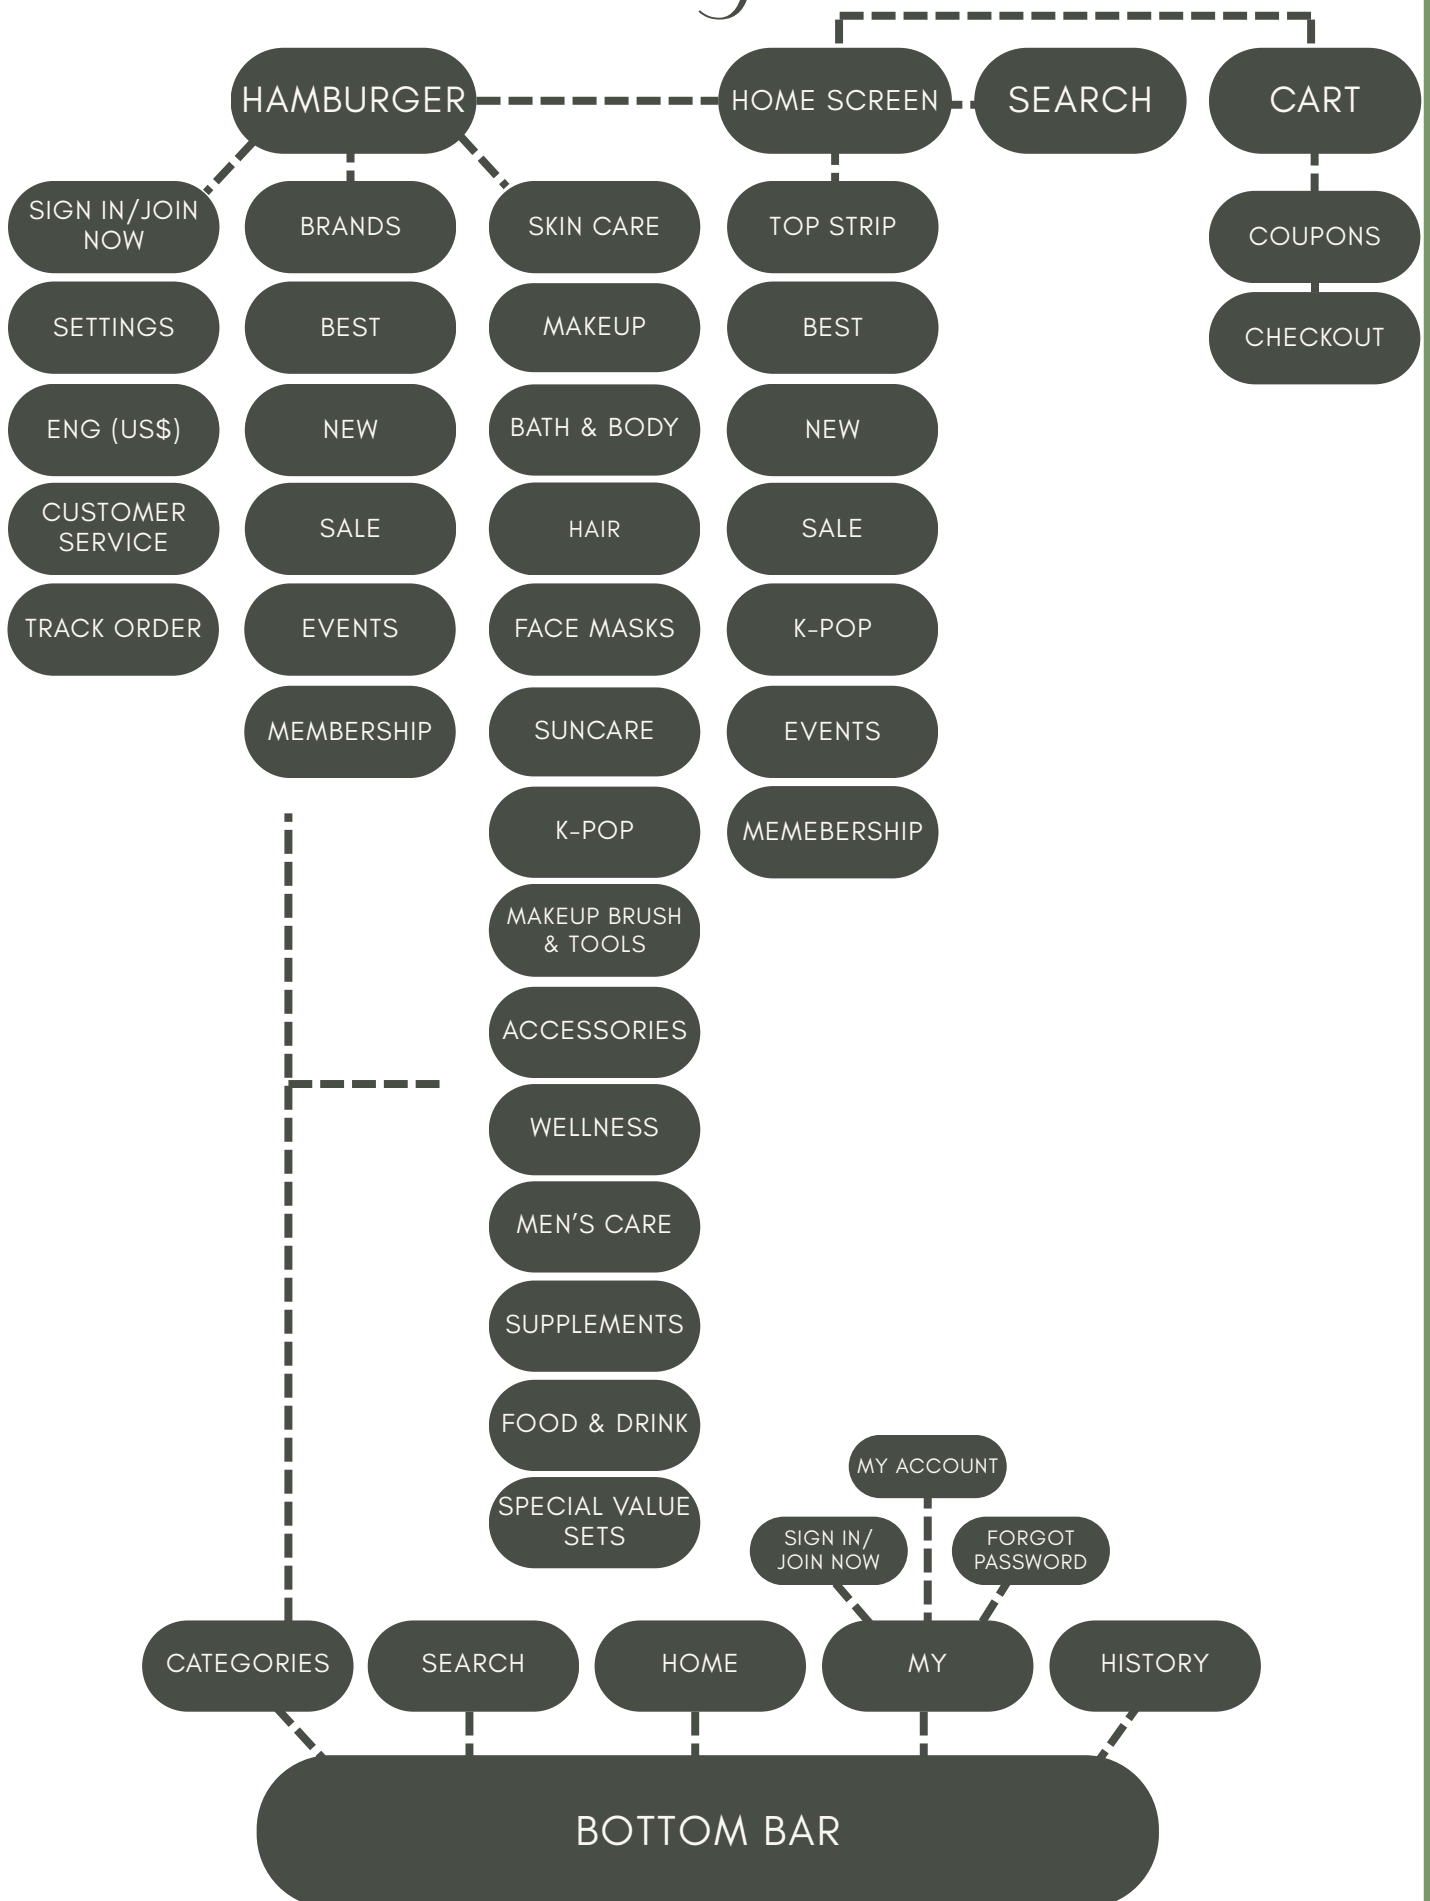

Installation, Sanity, Functionality, GUI, Usability, Compatibility, Accessibility, Interrupts/Notifications, Interface, Security, Performance, Stress/Recovery, and Localization.

Core areas tested:

- **User Registration & Login:** Data validation, secure sign-in, and smooth account creation.
- **Navigation & Menus:** Responsiveness, intuitiveness, and cross-device functionality.
- **Cart & Checkout:** Item management, quantity updates, discount application, and payment flow.
- **App Flow:** Screen transitions and logical navigation between sections.
- **Localization:** Accurate language, currency, and content for users outside South Korea.
- **Accessibility:** Screen reader support, color contrast, touch targets, and inclusive design.

Additional focus was placed on **screen loading times, crash handling, and ensuring a smooth shopping experience throughout the app.**

Testing Tree

Exit Criteria

The Olive Young mobile app will be approved for release only if the following conditions are met:

1. **Critical Severity Issues**

- All critical bugs (checkout failures, payment errors, app crashes) are fixed, retested, and closed.

2. **Major Severity Issues**

- All major bugs affecting key flows (cart loss after login) are fixed.

3. **Core Functionality Validated**

- Main user flows (login, cart, checkout, payment, buttons responsive) pass on supported devices.

4. **Performance & Stability**

- App loads key screens within acceptable limits and shows no major lags or crashes.

5. **Security & Session Handling**

- Session timeout works correctly, and no data is lost on login/logout or app backgrounding.

Conclusion

After completing a comprehensive testing cycle of the Olive Young mobile application, I have identified a total of **30 bugs**, including:

10 Critical bugs – Primarily affecting core functionality, compatibility, and security, such as app crashes, unoptimized resolution on other devices, approving invalid credentials, and silent item removals.

15 Major bugs – Mostly related to performance and stability, including very slow screen loading times, unresponsive UI elements, inconsistent layout, and poor session handling.

5 Moderate and Low bugs – These impact translation accuracy and UI/UX layout, contributing to a lack of polish and usability.

Most severe bugs disrupt the purchase flow, prevent users from completing orders properly, and could expose the app to data quality or security risks.

These issues significantly affect both the reliability and user trust in the application. This may lead to user frustration, abandonment, and incomplete transactions.

Based on the current state of the application –
It is not recommended for release.

Recommendations

ORDERED BY PRIORITY

1. **Fix Checkout, Payment & Cart Flow Bugs**

- Resolve unresponsive or broken “Place Order” buttons.
- Prevent silent product removals during checkout (due to out-of-stock).
- These are critical for revenue and must be addressed before any release.

2. **Improve Screen Load Performance**

- Optimize loading times across major screens (home, cart, checkout).
- Delays longer than 3 seconds create friction and increase bounce rates.
- Investigate causes like image size, API latency, or inefficient rendering.

3. **Ensure Button Responsiveness Across Devices**

- Fix cases where buttons do not respond to taps or clicks.
- Unresponsive elements lead to task failure and user frustration.

4. **Validate Inputs for Email and Shipping Address**

- Block invalid email formats (e.g., test..@.com/missing TLD) and incorrect shipping addresses.
- Prevent potential shipping failures and maintain data integrity.
- Add real-time validation and clear error messages.

5. **Add Accessibility Features**

- Ensure compliance with basic accessibility standards (WCAG), including screen reader support, larger text options, color contrast.
- Accessibility boosts usability and opens the app to a wider audience, including users with visual or motor impairments.

6. **Fix Bottom Bar Layout**

- Ensure consistent layout and behavior across all screens in the app.
- Avoid UI shifts or adding/changing icons that confuse users.

7. **Improve English Translations**

- Review and correct awkward or incorrect English translations.
- Provide consistent, context-aware language across the UI.

8. **Enable Offline Mode or Graceful Degradation**

- Allow users to access limited app functionality (product browsing or saved carts) when offline.
- At minimum, show a friendly “no internet” message instead of blocking the app or crashing.

TestRail

I used **TestRail** to design and organize the **test tree**, record all **test cases** in detail, and systematically execute and **track their results**. This ensured structured test management and clear visibility into testing coverage and outcomes.

☐	T99	Check if the amount of space "Olive Young" takes up on the device is reasonable	Passed
☐	T100	Check if the amount of CPU "Olive Young" takes up on the device while open is reasonable	Passed
☐	T101	Check if the battery lose while using "Olive Young" is reasonable	Passed
☐	T102	Check how does the app behave while the battery is on 100%	Passed
☐	T103	Check how does the app behave while the battery is on 50% and below	Passed
☐	T104	Check how does the app behave when connecting or disconnecting the charger from the power supply?	Passed
☐	T163	Check how the app behaves when there's no reception	Passed
☐	T368	Check how the app behaves when there reception is back on	Passed

Interface Testing 5

ID	Title	Assigned To	Status
☐	T381	Verify that the app requests permission before accessing the required device interfaces (if supported)	Passed
☐	T382	Ensure the app can use the device's Camera/Photos when permission is granted	Passed
☐	T383	Verify app behavior when Camera/Photos permission is denied	Passed
☐	T384	Ensure the app can use the device's Microphone when permission is granted	Passed
☐	T385	Verify app behavior when Microphone permission is denied	Passed

Bottom Bar 24

ID	Title	Assigned To	Status
☐	T80	Check that clicking "Categories" directs the user to a variation of categories	Passed
☐	T79	Check that clicking "Search" directs the user to a search bar	Passed
☐	T78	Check that clicking "Home" directs the user to the "Home Screen"	Passed
☐	T1	Check that clicking "My" directs the user to the login/sign up or their profile area (depends on whether logged in or not)	Passed
☐	T77	Check that clicking "History" directs the user to their history view	Passed
☐	T152	Check that the "Bottom Bar" remains stable when the user quickly switches between buttons	Passed
☐	T367	Check if the "Bottom Bar" remains visible when scrolling down and up on the feed	Passed
☐	T154	Ensure the app doesn't crash or lag on repeated taps	Passed
☐	T82	Validate no spelling mistakes	Passed
☐	T83	Validate that the fonts sizes are big and readable	Passed
☐	T81	Validate that the buttons are big enough to click on	Passed
☐	T84	Validate that the "Bottom Bar" are works with screen rotation	Passed
☐	T85	Validate that the buttons under "Bottom Bar" show a click indication when switching between the options	Passed
☐	T370	Validate that the button under "Bottom Bar" are consistent when selected and unselected	Passed
☐	T59	Check whether the "Bottom Bar" is comfortable to use with one hand	Passed
☐	T86	Verify that the "Bottom Bar" area functionality works across supported operating systems (Android/iOS)	Passed
☐	T87	Verify that the "Bottom Bar" area functionality works correctly across different resolutions (small phones, tablets)	Passed
☐	T60	Check the speed of switching between the options in the "Bottom Bar"	Passed
☐	T89	Validate that the color of the font does not blend with the background color	Passed
☐	T88	Ensure all buttons are labeled correctly for screen readres (e.g. TalkBack, VoiceOver)	Failed
☐	T90	Validate "Bottom Bar" area supports changing colors for people with different disabilities	Passed
☐	T91	Validate "Bottom Bar" area supports button size changes for people with different disabilities	Passed
☐	T372	Measure the speed time it takes to switch between the buttons in "Bottom Bar"	Passed
☐	T153	Ensure that the "Bottom Bar" remains responsive after a few minutes of user inactivity	Passed

Home Screen 25

ID	Title	Assigned To	Status
T243	Ensure the home screen is the default view after launching the app		Passed
T244	Validate banner taps redirect users to the correct promotional or product page		Passed
T247	Tapping the "Home" button in the "Bottom Bar" brings the user back to the top of the "Home Screen"		Passed
T261	Ensure there's a Footer		Passed
T245	Ensure app handles no internet gracefully		Passed
T254	Validate no spelling mistakes		Passed
T255	Validate that the fonts sizes are big and readable		Passed
T264	Ensure all fonts of the titles and labels are consistent		Passed
T256	Validate that the fields, buttons, images, and texts are positioned correctly (Left to Right)		Passed
T257	Validate that the buttons are big enough to click on		Passed
T246	Ensure the user can scroll through the home feed without lag or stutter		Passed
T250	Verify the "Home Screen" area works with screen rotation		Passed
T248	Verify "Home Screen" functionality works across supported operating systems (Android, iOS)		Passed
T258	Ensure layout, icons, and interactions behave the same across platforms		Passed
T249	Verify "Home Screen" functionality works across different resolutions (small phones, tablets)		Passed
T251	Ensure all fields are labeled correctly for screen readers (e.g., TalkBack, VoiceOver)		Failed
T252	Validate "Home Screen" area supports changing page colors for people with different disabilities		Passed
T253	Validate "Home Screen" area supports font size changes for people with different disabilities		Passed
T105	Check if "Olive Young" identifies the user's location		Passed
T106	Check if "Olive Young" identifies the user's currency and changes it according to their location (USD, NIS)		Passed
T107	Check if the "Olive Young" identifies the user's language and translating the app according to their location		Failed
T259	Measure how quickly the home screen loads after app launch		Passed
T260	Test how fast banners and product images appear after opening home		Passed
T262	Check how the app behaves when simulating 1000+ users accessing the home simultaneously		Failed
T263	Check how the app behaves when scrolling continuously for 2-3 minutes through the home feed		Passed

Hamburger 47

ID	Title	Assigned To	Status
T197	Ensure that clicking on the "Hamburger" icon directs the user to a variation of categories		Passed
T198	Ensure the name of the user's account is shown after clicking on the "Hamburger" icon (after Login/Sign In)		Passed
T241	Ensure that clicking "Join Now" under the "Hamburger" icon directs the user to register (only in case they are not connected)		Passed
T242	Ensure that clicking "Sign In" under the "Hamburger" icon directs the user to sign in (only in case they are not connected)		Passed
T240	Verify that the user can access their account from the "Hamburger" icon (after Login/Sign In)		Passed
T218	Ensure that clicking on the "Gear Wheel" under the "Hamburger" icon directs the user to the settings		Passed
T235	Verify that the user can change the Country and Currency settings under the "Hamburger" icon		Passed

☐	T321	Validate that the user can apply a valid City/Town according to their chosen country	Passed
☐	T323	Validate that the user can apply a valid Region according to their chosen country	Passed
☐	T324	Validate that the user can apply a valid Zip Code	Passed
☐	T325	Verify that the system provides relevant and valid Address and Location results when the user enters a keyword	Passed
☐	T326	Check by marking the field "Make this my default address" does indeed saves it as main address	Passed
☐	T327	Validate that the user can apply a valid Mobile Number	Passed
☐	T328	Validate that the user can apply a valid email address/change the current one	Passed
☐	T329	Validate that the user can use Points and update the total price accordingly	Passed
☐	T374	Ensure the user can remove Points and update the total price accordingly	Passed
☐	T330	Validate the user can purchase the order through a valid Paypal account	Passed
☐	T331	Validate the user can purchase the order with a valid Credit/Debit Card	Passed
☐	T332	Validate the user can purchase the order through a valid UnionPay account	Failed
☐	T333	Check by marking the field "Save Payment Preference" does indeed saves the payment information	Passed
☐	T334	Check by marking the field "Agree to All" the user agrees to the terms and the button "Place Order" is available	Passed
☐	T335	Ensure the "Place Order" button finalizes the purchase	Passed
☐	T336	Check if an order summary and ID displayed with confirmation email sent	Passed
☐	T317	Check the speed time it take for "Checkout" to load	Passed
☐	T337	Ensure the user can't enter an invalid Name with special characters	Passed
☐	T338	Ensure the user can't enter an invalid Name with numbers	Passed
☐	T339	Ensure the user cant enter an invalid address according to their chosen country (street, city, region and zip code)	Passed
☐	T340	Ensure the user can't enter an invalid Mobile Number	Passed
☐	T341	Ensure the user can't enter an invalid Email Address	Passed
☐	T342	Ensure the user can't enter and purchase with an invalid Paypal account information	Passed
☐	T343	Ensure the user can't enter and purchase with an invalid Credit Card	Passed
☐	T344	Ensure the user can't enter and purchase with an invalid UnionPay account information	Failed
☐	T345	Ensure the user can't proceed and place an order with empty required fields and a message is shown ("_____ is required")	Passed
☐	T347	Validate that the user can return from "Checkout" to the "Cart" without confusion while clicking back arrow	Passed
☐	T348	Validate the user can view the products on the same screen before clicking "Place Order"	Passed
☐	T349	Verify all input fields and buttons are well-aligned and clearly labeled	Passed
☐	T350	Check if the buttons give visual feedback when tapped (ripple, highlight, animation)	Passed
☐	T351	Ensure the user can view the Order Summary before placing an order	Passed
☐	T352	Check if the "Checkout" proceeds goes smoothly, easy to learn for the user (Cart - Address - Payment - Confirmation)	Passed
☐	T353	Check when clicking the "Place Order" button requires explicit confirmation	Passed
☐	T354	Check if the user leaves and returns to the screen, the inputs is still preserved	Passed
☐	T355	Verify "Checkout" functionality works across supported operating systems (Android,iOS)	Passed
☐	T356	Verify "Checkout" functionality works across different resolutions (small phones, tablets)	Passed
☐	T363	Check if the system prevents duplicate orders by disabling double taps on "Place Order"	Passed
☐	T364	Check if there's session times out, and the user is redirected back to "Cart" before proceeding	Passed
☐	T357	Confirm Data isn't lost when interrupted by a phone call	Passed
☐	T358	Test how the app handles push notifications	Passed
☐	T360	Validate that the color of the field headings does not blend with the background color	Passed
☐	T359	Measure how fast the "Checkout" loads	Passed
☐	T362	Measure how fast it takes to receive a confirmation and place an order	Passed
☐	T365	Try to Simulate 1,000 concurrent checkouts	Failed
☐	T366	Check how system behaves after multiple orders from same user in short time	Failed

Test Cases

Case ID	Title	Section	Status
C1	Check if "Olive Young" can be installed	Installation Testing	Passed
C2	Check if "Olive Young" can be deleted, and if so, is all data removed?	Installation Testing	Passed
C3	Check if "Olive Young" can be reinstalled after delete	Installation Testing	Passed
C4	Check if the system remembers that "Olive Young" was once installed	Installation Testing	Passed
C5	Check if "Olive Young" can update itself	Installation Testing	Failed
C6	Verify that the Olive Young app launches successfully	Sanity Testing	Passed
C7	Confirm the app exits gracefully	Sanity Testing	Passed
C8	Verify that a user can successfully complete the entire purchase flow by ordering a popular item (for example: Beauty of Joseon)	Sanity Testing	Passed
C9	Verify that a user can successfully complete the entire purchase flow by ordering a popular item (for example: Skin1004)	Sanity Testing	Passed
C10	Verify that a user can successfully complete the entire purchase flow by ordering a popular item (for example: Round Lab)	Sanity Testing	Passed
C11	Verify which kind of app is this (Native or Hybrid)	Sanity Testing	Passed
C12	Check the speed time it takes for "Olive Young" to be installed	Performance Testing	Passed

C13	Check the speed time it takes for "Olive Young" to open	Performance Testing	Passed
C14	Check if the amount of space "Olive Young" takes up on the device is reasonable	Performance Testing	Passed
C15	Check if the amount of CPU "Olive Young" takes up on the device while open is reasonable	Performance Testing	Passed
C16	Check if the battery lose while using "Olive Young" is reasonable	Performance Testing	Passed
C17	Check how does the app behave while the battery is on 100%	Performance Testing	Passed
C18	Check how does the app behave while the battery is on 50% and below	Performance Testing	Passed
C19	Check how does the app behave when connecting or disconnecting the charger from the power supply?	Performance Testing	Passed
C20	Check how the app behaves when there's no reception	Performance Testing	Passed
C21	Check how the app behaves when there reception is back on	Performance Testing	Passed
C22	Verify that the app requests permission before accessing the required device interfaces (if supported)	Interface Testing	Passed
C23	Ensure the app can use the device's Camera/Photos when permission is granted	Interface Testing	Passed
C24	Verify app behavior when Camera/Photos permission is denied	Interface Testing	Passed
C25	Ensure the app can use the device's Microphone when permission is granted	Interface Testing	Passed
C26	Verify app behavior when Microphone permission is denied	Interface Testing	Passed
C27	Check that clicking "Categories" directs the user to a variation of categories	Bottom Bar	Passed
C28	Check that clicking "Search" directs the user to a search bar	Bottom Bar	Passed

C29	Check that clicking "Home" directs the user to the "Home Screen"	Bottom Bar	Passed
C30	Check that clicking "My" directs the user to the login/sign up or their profile area (depends on whether logged in or not)	Bottom Bar	Passed
C31	Check that clicking "History" directs the user to their history view	Bottom Bar	Passed
C32	Check that the "Bottom Bar" remains stable when the user quickly switches between buttons	Bottom Bar	Passed
C33	Check if the "Bottom Bar" remains visible when scrolling down and up on the feed	Bottom Bar	Passed
C34	Ensure the app doesn't crash or lag on repeated taps	Bottom Bar	Passed
C35	Validate no spelling mistakes	Bottom Bar	Passed
C36	Validate that the fonts sizes are big and readable	Bottom Bar	Passed
C37	Validate that the buttons are big enough to click on	Bottom Bar	Passed
C38	Validate that the "Bottom Bar" are works with screen rotation	Bottom Bar	Passed
C39	Validate that the buttons under "Bottom Bar" show a click indication when switching between the options	Bottom Bar	Passed
C40	Validate that the button under "Bottom Bar" are consistent when selected and unselected	Bottom Bar	Passed
C41	Check whether the "Bottom Bar" is comfortable to use with one hand	Bottom Bar	Passed
C42	Verify that the "Bottom Bar" area functionality works across supported operating systems (Android/iOS)	Bottom Bar	Passed
C43	Verify that the "Bottom Bar" area functionality works correctly across different resolutions (small phones, tablets)	Bottom Bar	Passed
C44	Check the speed of switching between the options in the "Bottom Bar"	Bottom Bar	Passed

C45	Validate that the color of the font does not blend with the background color	Bottom Bar	Passed
C46	Ensure all buttons are labeled correctly for screen readres (e.g, TalkBack, VoiceOver)	Bottom Bar	Failed
C47	Validate "Bottom Bar" area supports changing colors for people with different disabilities	Bottom Bar	Passed
C48	Validate "Bottom Bar" area supports button size changes for people with different disabilities	Bottom Bar	Passed
C49	Measure the speed time it takes to switch between the buttons in "Bottom Bar"	Bottom Bar	Passed
C50	Ensure that the "Bottom Bar" remains responsive after a few minutes of user inactivity	Bottom Bar	Passed
C51	Verify that clickling "Remove all item(s)" removes all the recently viewed products	History	Passed
C52	Verify that clicking on "X" button closes the "History" section	History	Passed
C53	Verify that clicking outside the area of "History" closes the section	History	Passed
C54	Ensure consistency on Android vs. iOS	History	Passed
C55	Verify that clickling on "Cart" under "My" directs the user to their cart (whether it's empty or not)	My	Passed
C56	Verify that clicking on "Magnifying Glass" icon under "My" directs the user to a search bar	My	Passed
C57	Verify that clicking on "Left Arrow" icon directs the user to the main page	My	Passed
C58	Ensure consistency on Android vs. iOS	My	Passed
C59	Verify that clickling "Join Now" directs to registration	Join Now	Passed
C60	Under "Name" sign with with English letters	Join Now	Passed

C61	Under "Name" sign with with Hebrew letters	Join Now	Passed
C62	Under "Email ID" sign with a valid email	Join Now	Passed
C63	Under "Password" sign with valid password (8-16 characters)	Join Now	Passed
C64	Under "Age Group" sign with one of the selected ages	Join Now	Passed
C65	Under "Language Preference" sign with one of the selected option	Join Now	Passed
C66	Under "Date of Birth" sign with a valid date	Join Now	Passed
C67	Under "Gender" sign with one of the selected options	Join Now	Passed
C68	Under "Referrer" sign with a valid email	Join Now	Passed
C69	Under "Terms" sign with all the required boxes	Join Now	Passed
C70	Verify that clicking on the "Join Now" button creates an account	Join Now	Passed
C71	Attempt signing up without the required section "Name"	Join Now	Passed
C72	Attempt signing up without the required section "Email ID"	Join Now	Passed
C73	Attempt signing up without the required section "Password"	Join Now	Passed
C74	Attempt signing up without the required section "Age Group"	Join Now	Passed

C75	Attempt signing up without the required boxes under "Terms"	Join Now	Passed
C76	Attempt signing up under "Name" with disallowed special characters	Join Now	Passed
C77	Attempt signing up under "Name" with numbers	Join Now	Passed
C78	Attempt signing up under "Email" with an invalid email	Join Now	Passed
C79	Attempt signing up under "Email" with an email that already exists in the system	Join Now	Passed
C80	Attempt signing up under "Password" with less of the required characters (7 and below)	Join Now	Passed
C81	Validate that there are no spelling mistakes	Join Now	Passed
C82	Validate that the fonts sizes are big and readable	Join Now	Passed
C83	Validate that the fields, buttons, and texts are properly positioned and aligned (Left to Right)	Join Now	Passed
C84	Validate that the fields and buttons are big enough to click on	Join Now	Passed
C85	Verify that the "Join Now" area works with screen rotation	Join Now	Passed
C86	Verify that after creating an account, the layout of the app stays consistent	Join Now	Passed
C87	Validate that the button "Join Now" shows a click indication	Join Now	Passed
C88	Validate that input errors are clearly shown and user-friendly	Join Now	Passed
C89	Verify that performing any valid swipe goes smoothly without lagging	Join Now	Passed
C90	Verify that the "Join Now" area functionality works across supported operating systems (Android/iOS)	Join Now	Passed

C91	Verify that the "Join Now" area functionality works correctly across different resolutions (small phones, tablets)	Join Now	Passed
C92	Confirm data isn't lost when interrupted by a phone call	Join Now	Passed
C93	Test how the app handles push notifications	Join Now	Passed
C94	Measure how fast the app responds upon submission	Join Now	Passed
C95	Ensure password characters are masked during entry	Join Now	Passed
C96	Confirm sensitive data isn't stored locally after sign-up	Join Now	Failed
C97	Validate that the color of the field headings does not blend with the background color	Join Now	Passed
C98	Ensure all fields are labeled correctly for screen readers (e.g., TalkBack, VoiceOver)	Join Now	Failed
C99	Validate that the "Join Now" area supports changing page colors for people with different disabilities	Join Now	Passed
C100	Validate that the "Join Now" area supports font size changes for people with different disabilities	Join Now	Passed
C101	Simulate 100 users creating an account at once	Join Now	Failed
C102	Verify that the user can log in with correct email and password	Sign In	Passed
C103	Verify that the field "Save ID" is clickable and saves the information	Sign In	Passed
C104	Verify that the field "Keep me signed in" is clickable and keeps the users signed in next time they enter the app	Sign In	Passed
C105	Verify that the button "Sign In with Google" directs the user to their Google account	Sign In	Passed
C106	Verify that the button "Sign in with Apple" directs the user to their Apple Account	Sign In	Passed

C107	Verify that the button "Sign In" signs in the user and directs him to his account	Sign In	Passed
C108	Verify that the user can't login with incorrect credentials, and an error is shown	Sign In	Passed
C109	Verify that the user can't login with blank fields, and an error is shown	Sign In	Passed
C110	Verify that the user can't sign in with non-existent account	Sign In	Passed
C111	Validate that there are no spelling mistakes	Sign In	Passed
C112	Validate that the fonts sizes are big and readable	Sign In	Passed
C113	Validate that the fields, buttons, and texts are properly positioned and aligned (Left to Right)	Sign In	Passed
C114	Validate that the fields and buttons are big enough to click on	Sign In	Passed
C115	Verify that the "Sign In" area works with screen rotation	Sign In	Failed
C116	Validate that the button "Sign In" shows a click indication	Sign In	Failed
C117	Validate that input errors are clearly shown and user-friendly	Sign In	Passed
C118	Verify performing any valid swipe goes smoothly without lagging	Sign In	Passed
C119	Verify that the "Sign In" area functionality works across supported operating systems (Android/iOS)	Sign In	Passed
C120	Verify that the "Sign In" area functionality works correctly across different resolutions (small phones, tablets)	Sign In	Passed
C121	Confirm data isn't lost when interrupted by a phone call	Sign In	Passed
C122	Test how the app handles push notifications	Sign In	Passed

C123	Verify that the users can sign in with their Google account	Sign In	Passed
C124	Verify that the users can sign in with their Apple account	Sign In	Passed
C125	Measure how fast the app responds upon submission	Sign In	Passed
C126	Ensure password characters are masked during entry	Sign In	Passed
C127	Validate that the color of the field headings does not blend with the background color	Sign In	Passed
C128	Ensure all fields are labeled correctly for screen readers (e.g., TalkBack, VoiceOver)	Sign In	Failed
C129	Validate that the "Sign In" area supports changing page colors for people with different disabilities	Sign In	Passed
C130	Validate that the "Sign In" area supports font size changes for people with different disabilities	Sign In	Passed
C131	Simulate 100 users signing in their account at once	Sign In	Failed
C132	Verify that the button "Forgot Your Password?" directs the user to a password reset area	Forgot Your Password?	Passed
C133	Check that under "Name" and "Last Name" the user can apply a name that already exists under an email	Forgot Your Password?	Passed
C134	Check that under "Email Address" the user can apply an existing email in the system	Forgot Your Password?	Passed
C135	Check that the button "Cancel" directs the user back to "My" area (login/sign in)	Forgot Your Password?	Passed
C136	Check that the button "Continue" after completing the form directs the user to the following step	Forgot Your Password?	Passed
C137	Check that the button "Customer Service" directs the user to a following step	Forgot Your Password?	Passed
C138	Ensure the system allows users to request a reset link with a valid email	Forgot Your Password?	Passed

C139	Ensure reset link in the email redirects to a secure reset form	Forgot Your Password?	Passed
C140	Allow users to reset password successfully	Forgot Your Password?	Passed
C141	Check that the user can't reset a password with a unregistered email	Forgot Your Password?	Passed
C142	Verify that the user can't reset a password with a blank email field, and an error is shown	Forgot Your Password?	Passed
C143	Verify that the user can't reset a password with badly formatted email (..com,missing @, missing domain), and an error is shown	Forgot Your Password?	Passed
C144	Verify that the user can't reset a password with an expired reset link	Forgot Your Password?	Passed
C145	Validate no spelling mistakes	Forgot Your Password?	Passed
C146	Validate that the fonts sizes are big and readable	Forgot Your Password?	Passed
C147	Validate that the fields, buttons, and texts are properly positioned and aligned (Left to Right)	Forgot Your Password?	Passed
C148	Validate that the fields and buttons are big enough to click on	Forgot Your Password?	Passed
C149	Validate that "Forgot Your Password" area works with screen rotation	Forgot Your Password?	Passed
C150	Validate that the buttons show a click indication	Forgot Your Password?	Passed
C151	Ensure users understand what to do	Forgot Your Password?	Passed
C152	Validate user is notified clearly that an email was sent	Forgot Your Password?	Passed
C153	Validate that input errors are clearly shown and user-friendly	Forgot Your Password?	Passed
C154	Verify performing any valid swipe goes smoothly without lagging	Forgot Your Password?	Passed

C155	Verify that the "Forgot Your Password" area functionality works across supported operating systems (Android/iOS)	Forgot Your Password?	Passed
C156	Verify that the "Forgot Your Password" area functionality works across different resolutions (small phones, tablets)	Forgot Your Password?	Passed
C157	Confirm data isn't lost when interrupted by a phone call	Forgot Your Password?	Passed
C158	Test how the app handles push notifications	Forgot Your Password?	Passed
C159	Measure how fast the app responds upon submission	Forgot Your Password?	Passed
C160	Verify how fast reset email is sent after tapping "Send"	Forgot Your Password?	Passed
C161	Ensure the new password characters are masked during entry	Forgot Your Password?	Passed
C162	Check that the reset link expires after use	Forgot Your Password?	Passed
C163	Check that the new password must follow security rules (boundary test - length, special chars)	Forgot Your Password?	Passed
C164	Check that the password is never visible in Network Logs	Forgot Your Password?	Failed
C165	Validate that the colors of the fields and headings do not blend with the background color	Forgot Your Password?	Passed
C166	Ensure all fields are labeled correctly for screen readers (e.g., TalkBack, VoiceOver)	Forgot Your Password?	Failed
C167	Validate "Forgot Your Password" area supports changing page colors for people with different disabilities	Forgot Your Password?	Passed
C168	Validate "Forgot Your Password" area supports font size changes for people with different disabilities	Forgot Your Password?	Passed
C169	Ensure user can create an account	My Account	Passed
C170	Ensure user can access and view their profile details	My Account	Passed

C179	Validate that the user can access their "Reward Points"	My Account	Passed
C180	Validate that the user can access their "Cancellation History"	My Account	Passed
C181	Validate that the user can access the "Cart" from "My Account" area	My Account	Passed
C182	Validate that the user can access their "Wish List"	My Account	Passed
C183	Ensure invalid formats are rejected while updating details	My Account	Passed
C184	Ensure the user can't update their information with blank mandatory fields	My Account	Passed
C185	Validate no spelling mistakes	My Account	Passed
C186	Ensure all user details are labeled, visible, and aligned	My Account	Passed

C187	Ensure users can easily return to the main page from My Account (Back/Home buttons)	My Account	Passed
C188	Confirm actions like “Logout” or “Delete Account” prompt for user confirmation	My Account	Passed
C189	Verify "My Account" area works with screen rotation	My Account	Passed
C190	Verify performing any valid swipe goes smoothly without lagging	My Account	Passed
C191	Verify "My Account" functionality works across supported operating systems (Android/iOS)	My Account	Passed
C192	Verify "My Account" functionality works across different resolutions (small phones, tablets)	My Account	Passed
C193	Measure how fast the section loads	My Account	Passed
C194	Ensure changes to account details are reflected immediately or with minimal delay	My Account	Passed
C195	Ensure all fields are labeled correctly for screen readers (e.g., TalkBack, VoiceOver)	My Account	Failed
C196	Validate that the colors of the fields headings does not blend with the background color	My Account	Passed
C197	Validate that the "My Account" area supports changing page colors for people with different disabilities	My Account	Passed
C198	Validate "My Account" area supports font size changes for people with different disabilities	My Account	Passed
C199	Simulate 100 users updating their profile data at once	My Account	Failed
C200	Ensure consistency on Android vs. iOS	Home	Passed
C201	Ensure the user can search in the bar a valid product	Search	Passed
C202	Verify that the system provides relevant and valid search results when the user enters a product or keyword	Search	Passed

C203	Ensure the user can slide between "Popular searches" to "Recent searches"	Search	Passed
C204	Ensure consistency on Android vs. iOS	Search	Passed
C205	Ensure consistency on Android vs. iOS	Categories	Passed
C206	Ensure the home screen is the default view after launching the app	Home Screen	Passed
C207	Validate banner taps redirect users to the correct promotional or product page	Home Screen	Passed
C208	Tapping the "Home" button in the "Bottom Bar" brings the user back to the top of the "Home Screen"	Home Screen	Passed
C209	Ensure there's a Footer	Home Screen	Passed
C210	Ensure app handles no internet gracefully	Home Screen	Passed
C211	Validate no spelling mistakes	Home Screen	Passed
C212	Validate that the fonts sizes are big and readable	Home Screen	Passed
C213	Ensure all fonts of the titles and labels are consistent	Home Screen	Passed
C214	Validate that the fields, buttons, images, and texts are positioned correctly (Left to Right)	Home Screen	Passed
C215	Validate that the buttons are big enough to click on	Home Screen	Passed
C216	Ensure the user can scroll through the home feed without lag or stutter	Home Screen	Passed
C217	Verify the "Home Screen" area works with screen rotation	Home Screen	Passed
C218	Verify "Home Screen" functionality works across supported operating systems (Android, iOS)	Home Screen	Passed

C219	Ensure layout, icons, and interactions behave the same across platforms	Home Screen	Passed
C220	Verify "Home Screen" functionality works across different resolutions (small phones, tablets)	Home Screen	Passed
C221	Ensure all fields are labeled correctly for screen readers (e.g., TalkBack, VoiceOver)	Home Screen	Failed
C222	Validate "Home Screen" area supports changing page colors for people with different disabilities	Home Screen	Passed
C223	Validate "Home Screen" area supports font size changes for people with different disabilities	Home Screen	Passed
C224	Check if "Olive Young" identifies the user's location	Home Screen	Passed
C225	Check if "Olive Young" identifies the user's currency and changes it according to their location (USD, NIS)	Home Screen	Passed
C226	Check if the "Olive Young" identifies the user's language and translating the app according to their location	Home Screen	Failed
C227	Measure how quickly the home screen loads after app launch	Home Screen	Passed
C228	Test how fast banners and product images appear after opening home	Home Screen	Passed
C229	Check how the app behaves when simulating 1000+ users accessing the home simultaneously	Home Screen	Failed
C230	Check how the app behaves when scrolling continuously for 2–3 minutes through the home feed	Home Screen	Passed
C231	Ensure that clicking on the "Hamburger" icon directs the user to a variation of categories	Hamburger	Passed
C232	Ensure the name of the user's account is shown after clicking on the "Hamburger" icon (after Login/Sign In)	Hamburger	Passed
C233	Ensure that clicking "Join Now" under the "Hamburger" icon directs the user to register (only in case they are not connected)	Hamburger	Passed
C234	Ensure that clicking "Sign In" under the "Hamburger" icon directs the user to sign in (only in case they are not connected)	Hamburger	Passed

C235	Verify that the user can access their account from the "Hamburger" icon (after Login/Sign In)	Hamburger	Passed
C236	Ensure that clicking on the "Gear Wheel" under the "Hamburger" icon directs the user to the settings	Hamburger	Passed
C237	Verify that the user can change the Country and Currency settings under the "Hamburger" icon	Hamburger	Passed
C238	Verify that the user can change the app Language under the "Hamburger" icon	Hamburger	Passed
C239	Verify that the user can access Customer Service under the "Hamburger" icon	Hamburger	Passed
C240	Verify that the user can Sign Out of their account under the "Hamburger" icon	Hamburger	Passed
C241	Verify that the user can Track Orders under the "Hamburger" icon	Hamburger	Passed
C242	Verify that clicking on "Brands" under the "Hamburger" icon directs the user to the brands around the app	Hamburger	Passed
C243	Verify that clicking on "Best" under the "Hamburger" icon directs the user to the best sellers around the app	Hamburger	Passed
C244	Verify that clicking on "New" under the "Hamburger" icon directs the user to the new products around the app	Hamburger	Passed
C245	Verify that clicking on "Sale" under the "Hamburger" icon directs the user to the products that are on sale around the app	Hamburger	Passed
C246	Verify that clicking on "Events" under the "Hamburger" icon directs the user to the events around the app	Hamburger	Passed
C247	Verify that clicking on "Membership" under the "Hamburger" icon directs the user to the membership at the "Top Strip"	Hamburger	Passed
C248	Verify that clicking on "Skincare" under the "Hamburger" icon lets the user access and view all skin care products categories correctly	Hamburger	Passed
C249	Verify that clicking on "Makeup" under the "Hamburger" icon lets the user access and view all makeup products categories correctly	Hamburger	Passed
C250	Verify that clicking on "Bath & Body" under the "Hamburger" icon lets the user access and view all bath and body products categories correctly	Hamburger	Passed

C251	Verify that clicking on "Hair" under the "Hamburger" icon lets the user access and view all hair products categories correctly	Hamburger	Passed
C252	Verify that clicking on "Face Masks" under the "Hamburger" icon lets the user access and view all face masks products categories correctly	Hamburger	Passed
C253	Verify that clicking on "Suncare" under the "Hamburger" icon lets the user access and view all suncare products categories correctly	Hamburger	Passed
C254	Verify that clicking on "K-Pop" under the "Hamburger" icon lets the user access and view all K-Pop products categories correctly	Hamburger	Passed
C255	Verify that clicking on "Makeup Brush & Tools" under the "Hamburger" icon lets the user access and view makeup tools products categories correctly	Hamburger	Passed
C256	Verify that clicking on "Accessories" under the "Hamburger" icon lets the user access and view all accessories products categories correctly	Hamburger	Passed
C257	Verify that clicking on "Wellness" under the "Hamburger" icon lets the user access and view all wellness products categories correctly	Hamburger	Passed
C258	Verify that clicking on "Men's Care" under the "Hamburger" icon lets the user access and view all men's care products categories correctly	Hamburger	Passed
C259	Verify that clicking on "Supplements" under the "Hamburger" icon lets the user access and view all supplements products categories correctly	Hamburger	Passed
C260	Verify that clicking on "Food & Drink" under the "Hamburger" icon lets the user access and view all food & drink products categories correctly	Hamburger	Passed
C261	Verify that clicking on "Special Value Sets" under the "Hamburger" icon lets the user access and view packages products categories correctly	Hamburger	Passed
C262	Validate that all the categories under "Hamburger" icon are consistent by functionality	Hamburger	Passed
C263	Ensure the user can return from category to the main list without confusion while clicking back arrow	Hamburger	Passed
C264	Test system response when a category is empty (“No products found in this category” is shown?)	Hamburger	Passed
C265	Test the system response when repeatedly switching between categories	Hamburger	Passed
C266	Validate no spelling mistakes	Hamburger	Passed

C267	Ensure category items are visually aligned and not cut off	Hamburger	Passed
C268	Check that the categories are logically grouped and named	Hamburger	Passed
C269	Validate that the fields and buttons are big enough to click on	Hamburger	Passed
C270	Validate the buttons show a click indication	Hamburger	Passed
C271	Validate performing any valid swipe goes smoothly without lagging	Hamburger	Passed
C272	Verify functionality works across supported operating systems (Android/iOS)	Hamburger	Passed
C273	Verify functionality works across different resolutions (small phones, tablets)	Hamburger	Passed
C274	Measure how quickly the category screen loads	Hamburger	Passed
C275	Ensure all titles are labeled correctly for screen readres (e.g.,TalkBack, VoiceOver)	Hamburger	Failed
C276	Validate the area supports changing page colors for people with different disabilities	Hamburger	Passed
C277	Validate the area supports font size changes for people with different disabilities	Hamburger	Passed
C278	Ensure the top strip appears on all main screens	Top Strip	Passed
C279	Verify that clicking on "Best" in the "Top Strip" directs the user to the best sellers around the app	Top Strip	Passed
C280	Verify that clicking on "New" in the "Top Strip" directs the user to the new products around the app	Top Strip	Passed
C281	Verify that clicking on "Sale" in the "Top Strip" directs the user to the products that are on sale around the app	Top Strip	Passed
C282	Verify that clicking on "K-Pop" in the "Top Strip" directs the user to the K-Pop prodcts around the app	Top Strip	Passed

C283	Verify that clicking on "Events" in the "Top Strip" directs the user to the events around the app	Top Strip	Passed
C284	Verify that clicking on "Membership" in the "Top Strip" directs the user to the membership screen	Top Strip	Passed
C285	Check the behavior of the app by tapping quickly between buttons (does it crash?)	Top Strip	Passed
C286	Validate that the buttons are big enough to click on	Top Strip	Passed
C287	Validate that the fonts sizes are big and readable	Top Strip	Passed
C288	Check if the buttons give visual feedback when tapped (ripple, highlight, animation)	Top Strip	Passed
C289	Verify "Top Strip" functionality works across supported operating systems (Android/iOS)	Top Strip	Passed
C290	Verify "Top Strip" functionality works across different resolutions (small phones, tablets)	Top Strip	Passed
C291	Ensure the user can swipe through the "Top Strip" without lag or stutter	Top Strip	Passed
C292	Measure how quickly the categories screen load	Top Strip	Passed
C293	Ensure "Search" button appears on all main screens	Search	Passed
C294	Ensure the user can search in the bar a valid product	Search	Passed
C295	Verify that the system provides relevant and valid search results when the user enters a product or keyword	Search	Passed
C296	Ensure the user can slide between "Popular searches" to "Recent searches"	Search	Passed
C297	Ensure consistency on Android vs. iOS	Search	Passed
C298	Ensure that clicking on the "Cart" icon directs the user to the their cart	Cart & Coupons	Passed

C299	Ensure the user can change their shipping to other countries under "Cart"	Cart & Coupons	Passed
C300	Ensure that tapping "Add to Cart" adds the product	Cart & Coupons	Passed
C301	Ensure the user can read all cart items load with correct info	Cart & Coupons	Passed
C302	Check if quantity can be increased or decreased	Cart & Coupons	Passed
C303	Check if updates are saved and reflected immediately accordingly to a quantity change	Cart & Coupons	Passed
C304	Check that when a product is added to the "Cart" the number of items is updated in the cart icon and the number is clearly and correctly visible	Cart & Coupons	Passed
C305	Ensure user can remove items from "Cart"	Cart & Coupons	Passed
C306	Ensure the cart shows a placeholder or message when empty	Cart & Coupons	Passed
C307	Ensure that the user can apply a promo code by clicking on the button "Apply"	Cart & Coupons	Passed
C308	Ensure that the user use valid coupons	Cart & Coupons	Passed
C309	Ensure that the user can apply all the coupons available at once by selecting the field "Maximum Benefits Applied"	Cart & Coupons	Passed
C310	Ensure that the user can choose between the different available coupons	Cart & Coupons	Passed
C311	Ensure the system calculates and shows the right final price after using any coupons	Cart & Coupons	Passed
C312	Ensure the user can see the final price before procceding to "Checkout"	Cart & Coupons	Passed
C313	Ensure the user can view the order preview before proceeding to "Checkout"	Cart & Coupons	Passed
C314	Ensure the user can see the supported payment methods	Cart & Coupons	Passed

C315	Ensure that the button "Continue Shopping" under "Cart" directs the user to the "Main Page"	Cart & Coupons	Passed
C316	Ensure that the button "Proceed to Checkout" directs the user to "Checkout"	Cart & Coupons	Passed
C317	Check if the user can apply an expired or invalid Coupon	Cart & Coupons	Failed
C318	Check if the user can apply an invalid Promo Code	Cart & Coupons	Failed
C319	Check if the user can remove an item during network failure	Cart & Coupons	Passed
C320	Set invalid quantity to 1,000	Cart & Coupons	Passed
C321	Check that when increasing or decreasing the quantity of the product in the cart with a quick double click, the quantity changes accordingly	Cart & Coupons	Passed
C322	Check if the product image, title, price, and quantity controls are visible and aligned	Cart & Coupons	Passed
C323	Check how does the system behaves when removing a product (ask "Are you sure?" before removing)	Cart & Coupons	Passed
C324	Check if the buttons give visual feedback when tapped (ripple, highlight, animation)	Cart & Coupons	Passed
C325	Check if clicking on the title/image of the product directs the user to the product screen	Cart & Coupons	Passed
C326	Check when applying invalid quantity, the system shows an error notification	Cart & Coupons	Passed
C327	Verify "Cart" functionality and UI works across supported operating systems (Android/iOS)	Cart & Coupons	Passed
C328	Verify "Cart" functionality works across different resolutions (small phones, tablets)	Cart & Coupons	Passed
C329	Check the speed time it takes for "Cart" to load	Cart & Coupons	Passed
C330	Check the speed time it takes to update the cart by quantity change	Cart & Coupons	Passed

C331	Validate that the color of the field headings does not blend with the background color	Cart & Coupons	Passed
C332	Validate that the user can apply a valid shipping address (country)	Checkout	Passed
C333	Validate that the user can apply a valid name in English letters	Checkout	Passed
C334	Validate that the user can apply a valid name in Hebrew letters	Checkout	Passed
C335	Validate that the user can apply a valid Street address according to their chosen country	Checkout	Passed
C336	Validate that the user can apply a valid City/Town according to their chosen country	Checkout	Passed
C337	Validate that the user can apply a valid Region according to their chosen country	Checkout	Passed
C338	Validate that the user can apply a valid Zip Code	Checkout	Passed
C339	Verify that the system provides relevant and valid Address and Location results when the user enters a keyword	Checkout	Passed
C340	Check by marking the field "Make this my default address" does indeed save it as main address	Checkout	Passed
C341	Validate that the user can apply a valid Mobile Number	Checkout	Passed
C342	Validate that the user can apply a valid email address/change the current one	Checkout	Passed
C343	Validate that the user can use Points and update the total price accordingly	Checkout	Passed
C344	Ensure the user can remove Points and update the total price accordingly	Checkout	Passed
C345	Validate the user can purchase the order through a valid Paypal account	Checkout	Passed
C346	Validate the user can purchase the order with a valid Credit/Debit Card	Checkout	Passed

C347	Validate the user can purchase the order through a valid UnionPay account	Checkout	Failed
C348	Check by marking the field "Save Payment Preference" does indeed saves the payment information	Checkout	Passed
C349	Check by marking the field "Agree to All" the user agrees to the terms and the button "Place Order" is available	Checkout	Passed
C350	Ensure the "Place Order" button finalizes the purchase	Checkout	Passed
C351	Check if an order summary and ID displayed with confirmation email sent	Checkout	Passed
C352	Check the speed time it take for "Checkout" to load	Checkout	Passed
C353	Ensure the user can't enter an invalid Name with special characters	Checkout	Passed
C354	Ensure the user can't enter an invalid Name with numbers	Checkout	Passed
C355	Ensure the user cant enter an invalid address according to their chosen country (street, city, region and zip code)	Checkout	Passed
C356	Ensure the user can't enter an invalid Mobile Number	Checkout	Passed
C357	Ensure the user can't enter an invalid Email Address	Checkout	Passed
C358	Ensure the user can't enter and purchase with an invalid Paypal account information	Checkout	Passed
C359	Ensure the user can't enter and purchase with an invalid Credit Card	Checkout	Passed
C360	Ensure the user can't enter and purchase with an invalid UnionPay account information	Checkout	Failed
C361	Ensure the user can't proceed and place an order with empty required fields and a message is shown ("___ is required")	Checkout	Passed
C362	Validate that the user can return from "Checkout" to the "Cart" without confusion while clicking back arrow	Checkout	Passed

C363	Validate the user can view the products on the same screen before clicking "Place Order"	Checkout	Passed
C364	Verify all input fields and buttons are well-aligned and clearly labeled	Checkout	Passed
C365	Check if the buttons give visual feedback when tapped (ripple, highlight, animation)	Checkout	Passed
C366	Ensure the user can view the Order Summary before placing an order	Checkout	Passed
C367	Check if the "Checkout" proceeds goes smoothly, easy to learn for the user (Cart - Address - Payment - Confirmation)	Checkout	Passed
C368	Check when clicking the "Place Order" button requires explicit confirmation	Checkout	Passed
C369	Check if the user leaves and returns to the screen, the inputs is still preserved	Checkout	Passed
C370	Verify "Checkout" functionality works across supported operating systems (Android,iOS)	Checkout	Passed
C371	Verify "Checkout" functionality works across different resolutions (small phones, tablets)	Checkout	Passed
C372	Check if the system prevents duplicate orders by disabling double taps on "Place Order"	Checkout	Passed
C373	Check if there's session times out, and the user is redirected back to "Cart" before proceeding	Checkout	Passed
C374	Confirm Data isn't lost when interrupted by a phone call	Checkout	Passed
C375	Test how the app handles push notifications	Checkout	Passed
C376	Validate that the color of the field headings does not blend with the background color	Checkout	Passed
C377	Measure how fast the "Checkout" loads	Checkout	Passed
C378	Measure how fast it takes to receive a confirmation and place an order	Checkout	Passed
C379	Try to Simulate 1,000 concurrent checkouts	Checkout	Failed
C380	Check how system behaves after multiple orders from same user in short time	Checkout	Failed

Jira Reports

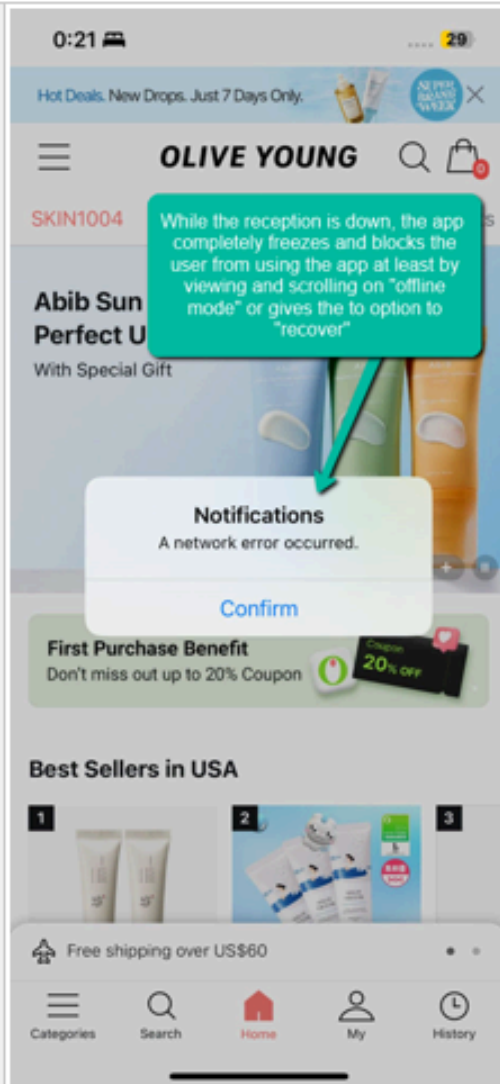

I used **Jira** to **report and manage the bugs** identified after executing my test cases, ensuring all issues were clearly documented and easy to tracks.

[OY-1] The App blocks the user from using it and freezes when the reception is down Created: 20/Jun/25 Updated: 24/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Medium
Reporter:	Tal Jacqueline Goaz	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Attachments:

Severity:

Critical

Description

Steps to Reproduce

Step 1. Open the app "Olive Young"

Step 1. Switch the settings on the phone to "Airplane Mode" or go to a place with no reception

Step 2. Go back to "Olive Young" once again

Actual Result

A blocking error notification pops up: "A network error occurred," and the app freezes.

Expected Result

The App will indeed pop up an error notification, but **will not** freeze and prevent the user from proceeding at least to "view" and scroll through the loaded content.

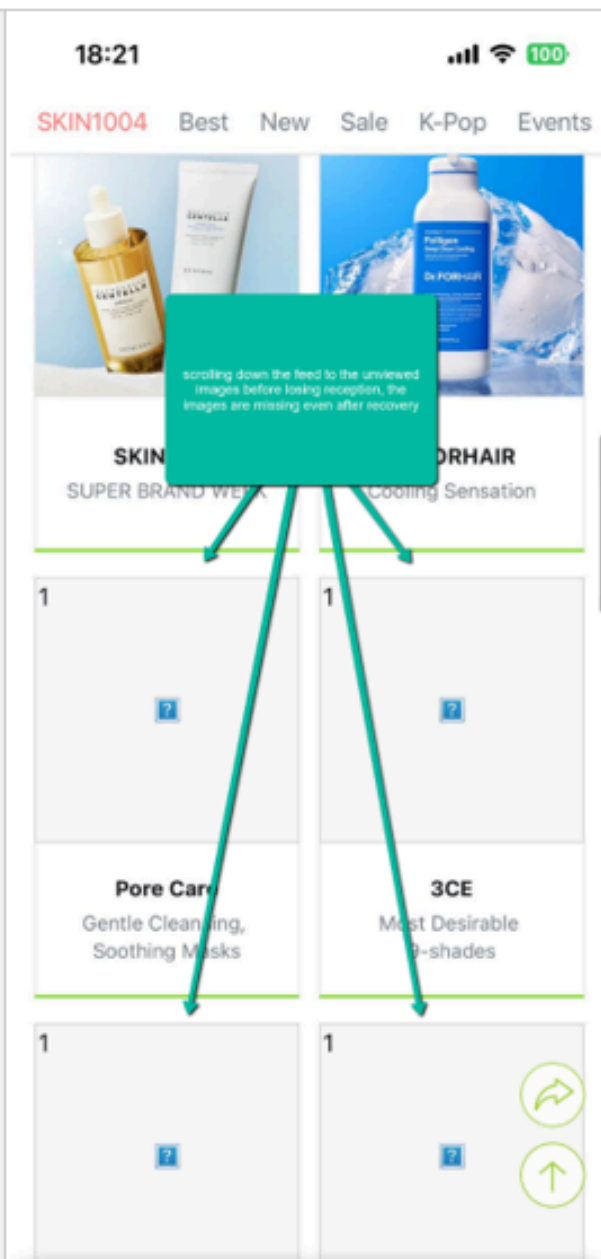

The user should at least use an "Offline Mode".

[OY-2] After reception is back on, the unseen images on the rest of the feed stay blocked Created: 20/Jun/25 Updated: 20/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Medium
Reporter:	Tal Jacqueline Goaz	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Attachments:

Severity:

Major

Description

Steps to Reproduce

- Step 1. Open the app "Olive Young"
- Step 2. Switch the settings on the phone to "Flying Mode" or go to a place with no reception
- Step 2. Go back to "Olive Young" once again
- Step 4. Scroll down to the images that have not been viewed yet

Actual Result

The images and banners that have not been viewed before the reception went down stay "blocked" and do not load after recovery.

Only after closing the app and loading it back up - the missing images are visible.

Expected Result

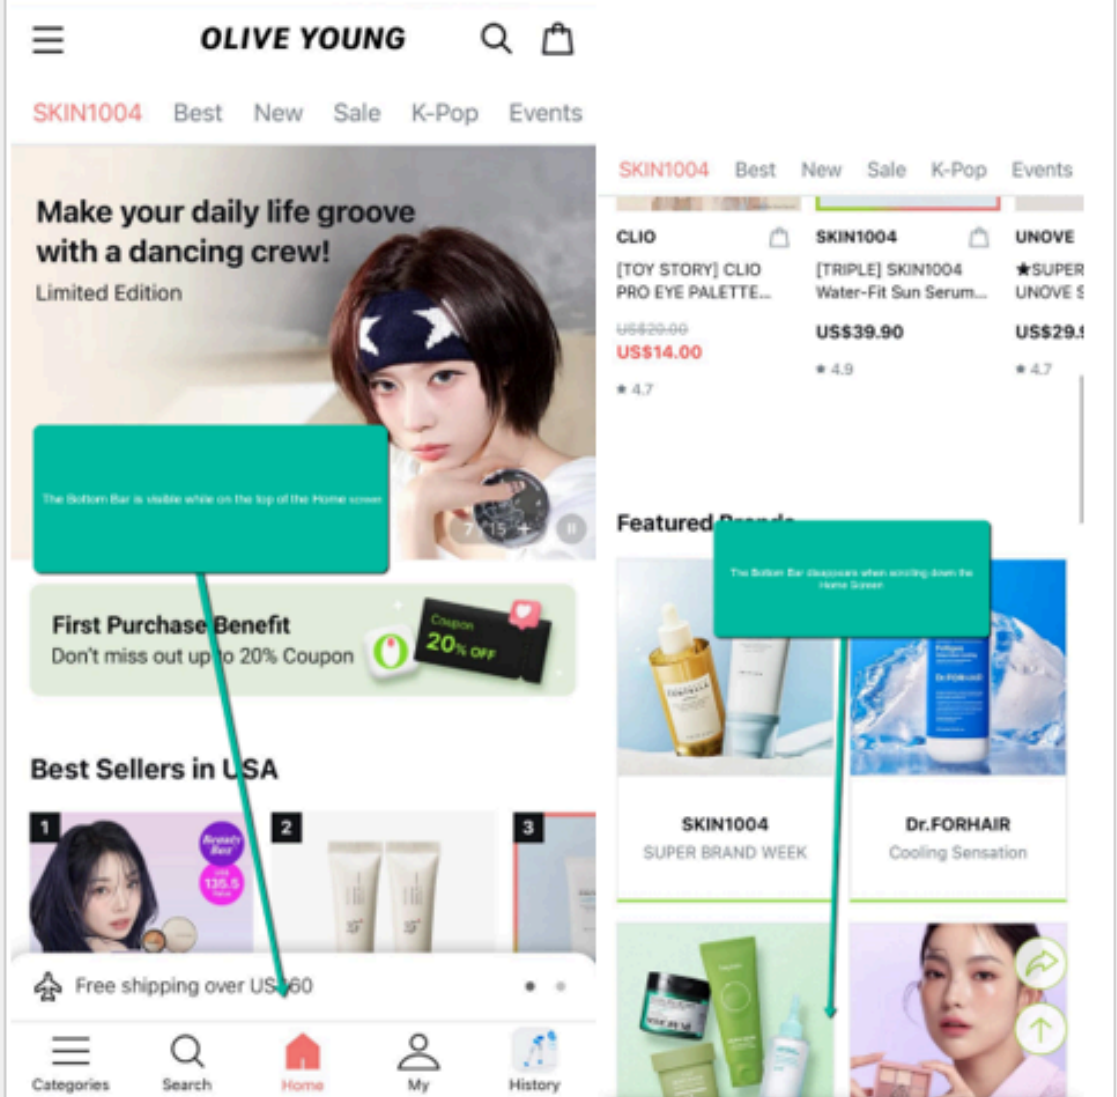

The images and banners would load correctly after recovery.

[OY-3] [The Bottom Bar disappears when scrolling down the feed](#) Created: 20/Jun/25 Updated: 20/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Medium
Reporter:	Tal Jacqueline Goaz	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None

Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Attachments:

Severity:

Major

Description

Steps to Reproduce

Step 1. Open the app "Olive Young"

Step 2. While on the Home Screen, scroll down the feed

Actual Result

The Bottom Bar disappears while scrolling down the app, even for a tiny bit.

Expected Result

The Bottom Bar will remain visible the entire time, also while scrolling.

[OY-4] Switching between the buttons in the Bottom Bar takes 3-4 seconds long Created: 20/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Medium
Reporter:	Tal Jacqueline Goaz	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Severity:	Major
-----------	-------

Description

Steps to Reproduce

Step 1. Open the app "Olive Young"

Step 2. Click on "My" section at the "Bottom Bar"

Step 3. Switch back to the "Home" section at the "Bottom Bar"

Actual Result

There's a loading icon spinning on screen on each section, and it takes around 2-3 seconds to load to selected screen.

Expected Result

Switching between the options at the "Bottom Bar" should be smooth and quick, nearly up to one second only.

[OY-5] [Olive Young doesn't include Accessibility features for people with different disabilities](#) Created: 20/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	High
Reporter:	Tal Jacqueline Goaz	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Severity:	Critical
-----------	----------

Description

Steps to Reproduce

Step 1. Open the app "Olive Young"

Step 2. Search for the help feature "Accessibility"

Actual Result

There's no accessibility feature in this app.

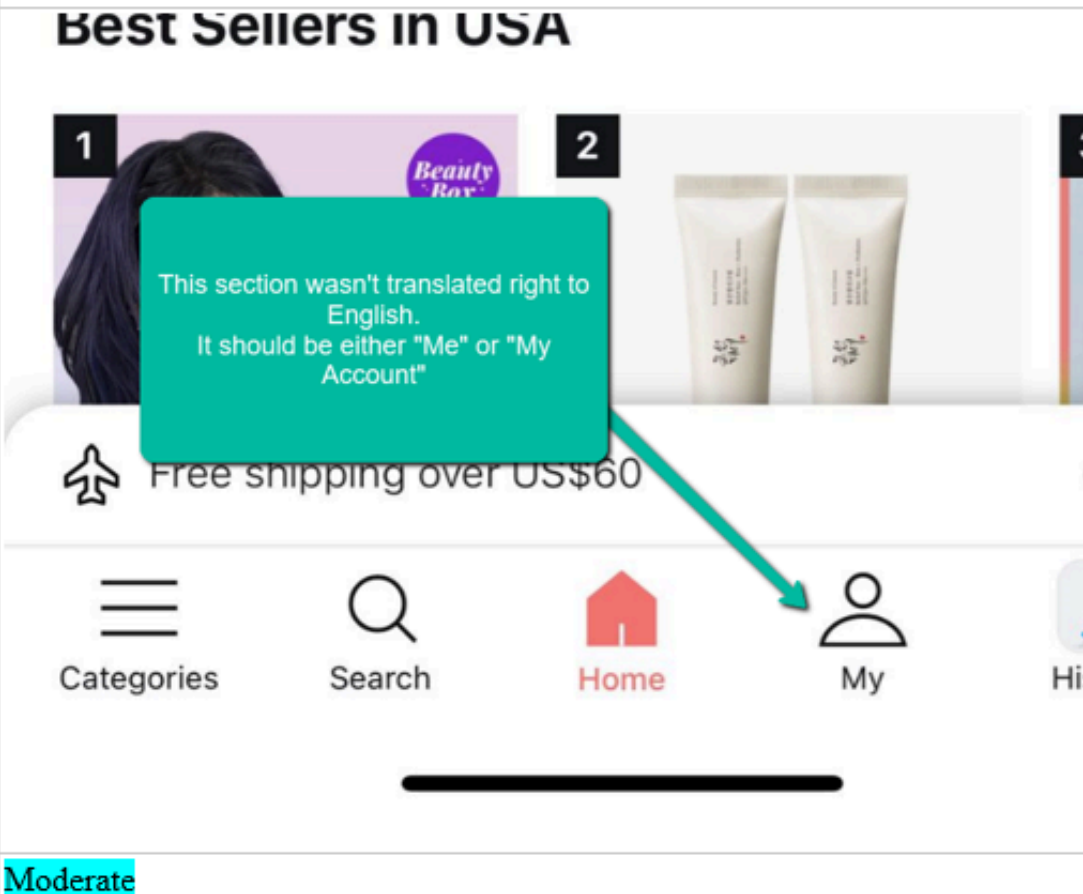

Expected Result

As an app with a huge variety of different products, there should be an accessibility feature for people with disabilities who can't read properly, hear or have motor abilities.

[OY-6] [The Bottom Bar has poor translation at the "My" section](#) Created: 20/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Medium
Reporter:	Tal Jacqueline Goaz	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0

Attachments:	
Severity:	Moderate

Description

Steps to Reproduce

Step 1. Open the app "Olive Young"

Step 2. Look at the section "My" at the Bottom Bar

Actual Result

The user's section is translated as "My".

Expected Result

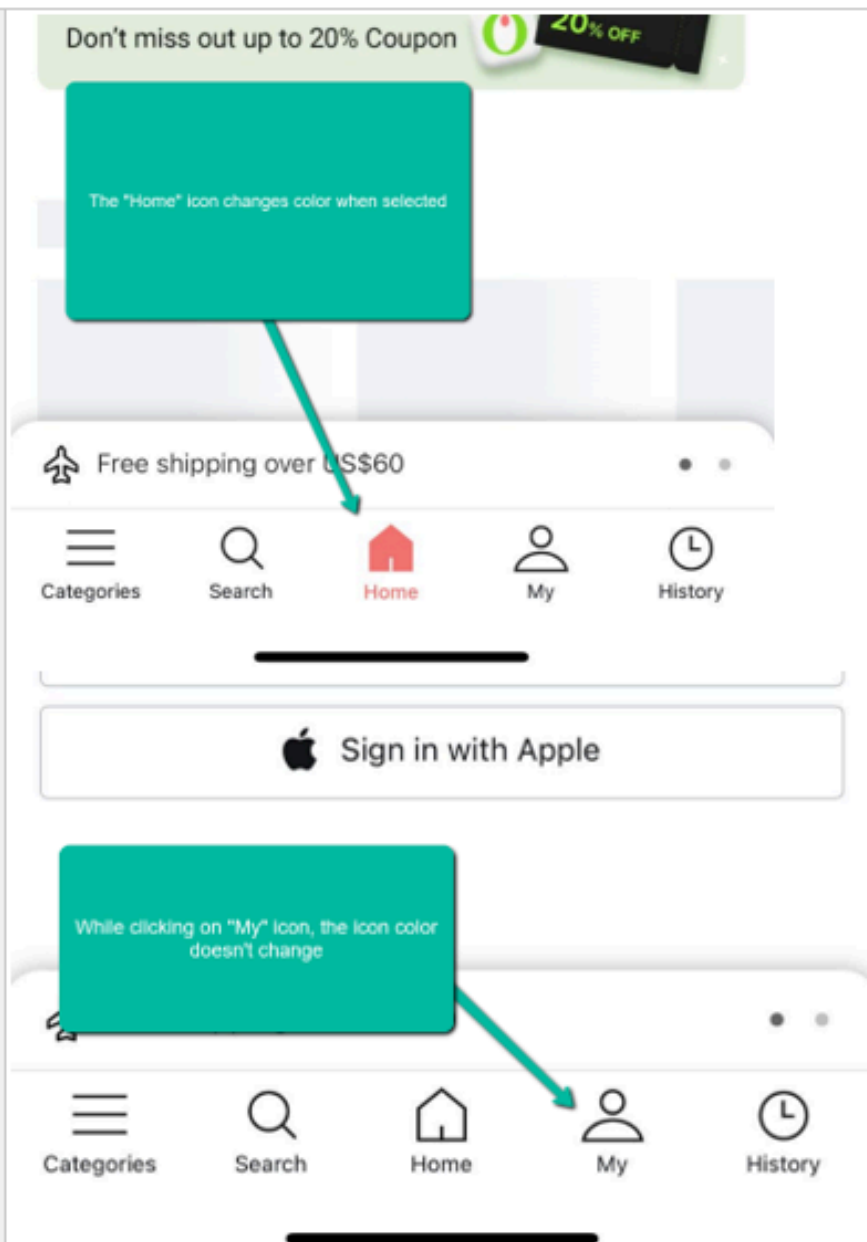

The user's section should be translated as "Me" or "My Account", as it may sound confusing otherwise.

[OY-7] While switching between options at the Bottom Bar, there's color indication only at the "Home" icon most of the times Created: 20/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young

Attachments:

Severity: **Moderate**

Description

Steps to Reproduce

- Step 1. Open the app "Olive Young"
- Step 2. Click on the "My" icon, for example
- Step 3. Click on the "Home" next

Actual Result

There's inconsistency, the "Home" icon changes color, but the "My" icon does not.

Expected Result

All buttons should change their colors according to the user's selection.

Description

Steps to Reproduce

- Step 1. Open the app "Olive Young"
- Step 2. Click on "My" section at the "Bottom Bar"
- Step 3. Click on "Join Now"
- Step 4. Fill the required fields
- Step 5. Click on "Join Now" to create an account

Actual Result

A confirmation message appears, and the "Bottom Bar" changes completely.

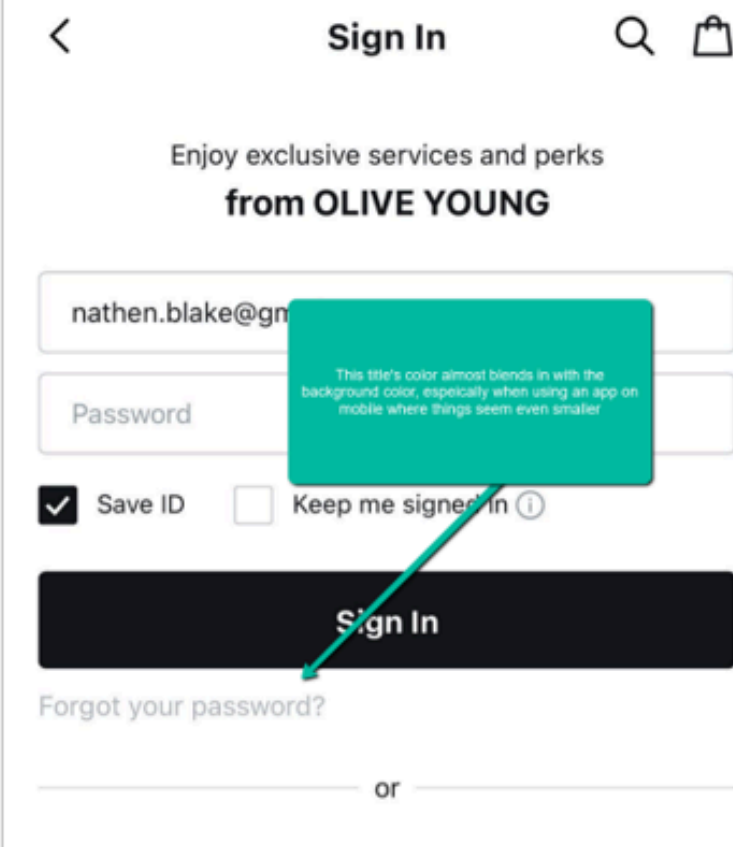

Expected Result

A confirmation message will appear, and the "Bottom Bar" stays the same as before.

[OY-10] The button "Forgot your password?" blends in with the background color Created: 20/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Low
Reporter:	Tal Jacqueline Goaz	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Attachments:	 The screenshot shows the Olive Young mobile app sign-in screen. At the top, there's a navigation bar with a back arrow, the title 'Sign In', and search and shopping bag icons. Below the title, a message says 'Enjoy exclusive services and perks from OLIVE YOUNG'. The sign-in form includes an email field (containing 'nathen.blake@gmail.com'), a password field, and two checkboxes: 'Save ID' (checked) and 'Keep me signed in' (unchecked). A red arrow points to the 'Forgot your password?' link below the 'Sign In' button. A red box highlights the text 'This title's color almost blends in with the background color, especially when using an app on mobile where things seem even smaller'.
Severity:	Moderate

Description

Steps to Reproduce

Step 1. Open the app "Olive Young"

Step 2. Click on "My" section at the "Bottom Bar"

Step 3. Watch button "Forgot your password?"

Actual Result

The title of the button is too bright, it almost blends with the background color, especially when using a mobile app.

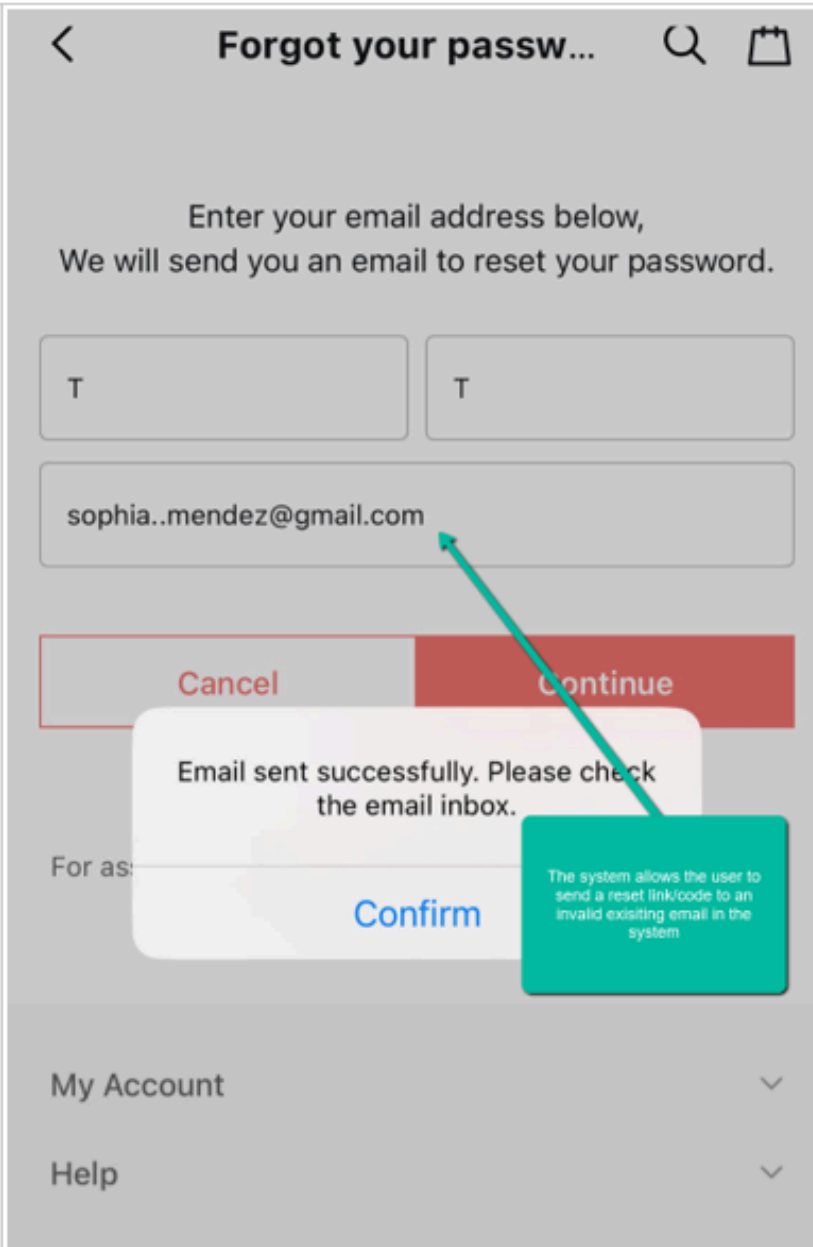

Expected Result

All the titles in this app should be darker compared to the background color, so the user could see things clearly and not have a hard time using the app.

[OY-11] [When trying to reset a password, the system allows to apply invalid registered emails](#) Created: 21/Jun/25 Updated: 21/Jun/25

Attachments:	 Hi, there! > Brands Best New Sale Events Membership Skincare Makeup Bath & Body Hair
Severity:	Low

Description

Steps to Reproduce

Step 1. Open the app "Olive Young"

Step 2. Log in to an existing account (whether through the "My" section or through the "Hamburger" icon)

Step 3. Click on the "Hamburger" icon on the left side of the screen

Actual Result

The system doesn't recognize the user's name after login, and instead, there's a button with the sentence "Hi, There!"

Expected Result

After login, the system should recognize the user's name, and the button "Hi, There!" at the "Hamburger" icon that directs the user to their account, should be written as "Hi, (first name of the user's name)!".

[OY-14] The screens on different categories under the "Hamburger" take 3-4 seconds to load Created: 21/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Medium

Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Severity:	Major
-----------	-------

Description

Steps to Reproduce

Step 1. Open the app "Olive Young"

Step 2. Click on the "Hamburger" icon

Step 3. Click on the categories "K-Pop", "Accessories", or the other categories with a pop-up beforehand, like "Skincare"

Actual Result

The screens of the selected categories load up pretty slowly (around 3-4 seconds), which can affect the user experience.

Expected Result

The screen of the selected categories should load up quickly and smoothly, not more than 1-2 seconds.

[OY-15] The categories under the "Hamburger" icon are not consistent by functionality (some have pop-ups, some not) Created: 21/Jun/25 Updated: 21/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Mobile: iPhone 13 Pro Operating System: iOS Internet: 4G/ Wi-Fi 1GB Fibers		

Attachments:

Severity:

Major

Description

Steps to Reproduce

Step 1. Open the app "Olive Young"

Step 2. Click on the "Hamburger" icon

Step 3. Click on the following categories: "Skincare", "Makeup", "Bath & Body", "Hair", "Face Masks", and "Suncare".

Step 4. Now click on the following categories: "K-Pop", "Makeup Brush & Tools", "Accessories", "Wellness", "Men's Care", "Supplements", "Food & Drink", and "Special Value Sets".

Actual Result

The categories mentioned on Step 3 have a pop-up with different products of the same category, though the rest of the categories mentioned on Step 4 do not.

Expected Result

All the categories should have the same pattern - either open a popup of different types of products of the same category and then direct to a screen by choice, **or** all open a general screen of the same category instantly.

[OY-16] Each category screen in the 'Top Strip' section takes approximately 3–4 seconds to fully load Created: 21/Jun/25 Updated: 21/Jun/25

Delivery could be delayed or returned if recipient's full name is not provided.

The screenshot shows a shipping address form with the following fields and values:

- Search: 22222
- Apt/Suite/Other (optional):
- City*: ALTA
- State/Province*: California
- Zip/Postal Code*: 11111

A teal callout box with the text "The system allows the user to provide an invalid address under an existing state and city." has two arrows pointing to the "City*" and "Zip/Postal Code*" fields. Below the form is a dark blue button labeled "Save & Continue".

Severity:**Critical****Description****Steps to Reproduce**

- Step 1. Open the app "Olive Young"
- Step 2. Choose an item from "Home Screen" and click "Add to Cart"
- Step 3. Click "Proceed to Cart"
- Step 4. Click "Proceed to Checkout"
- Step 5. Under "Shipping Address", add the following address: 22222, ALTA, California, 11111
- Step 6. Continue with the required field and click "Place Order"

Actual Result

The system approves this invalid address and lets the user proceed with the order.

Expected Result

The system will pop-up a notification: "This address is invalid, please provide a correct address", or block the user from using an address that is not included in the provided list when choosing keywords.

Severity:

Major

Description

Steps to Reproduce

- Step 1. Install and open the Olive Young app on any iPad device
- Step 2. Navigate through various screens (e.g., Home, Product Page, Cart)
- Step 3. Observe how the layout and elements appear

Actual Result

The layout does not adjust appropriately to the iPad screen dimensions.

Expected Result

The app should adapt responsively to iPad screen sizes, maintaining proper alignment, spacing, and scaling of UI elements.

[OY-30] [App crashes randomly during Sign In on iPad devices](#) Created: 23/Jun/25 Updated: 23/Jun/25

Status:	To Do
Project:	Olive Young
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Medium

Attachments:**Severity:** Critical**Description****Steps to Reproduce**

- Step 1. Launch the Olive Young app on an iPad
- Step 2. Navigate to the Sign In screen
- Step 3. Enter valid credentials
- Step 4. Tap the "Sign In" button
- Step 5. Observe the app behaviour

Actual Result

The app crashes unexpectedly during or immediately after the sign-in attempt.
Crash behaviour is inconsistent.

Expected Result

The user should be successfully signed in and redirected to the home screen without any crashes.
